

Business Plan (2026-2029)

Performance Aesthetics Lab

Cosmetics + Bodybuilding + Looksmaxing

Generated on: 2026-02-22

1. Executive Summary

Performance Aesthetics Lab is a compliance-first consumer brand at the intersection of cosmetic performance, body performance, and looks optimization. The plan focuses on legally durable product categories: topical cosmetics, sports supplements, and protocol-based bundles.

Core thesis: Build one trusted routine ecosystem where customers buy repeatedly across skin, body, and grooming instead of one-off products.

2. Market Opportunity Snapshot

Segment	Current Scale (approx)	2030 Direction	Growth Signal
Beauty & personal care	USD ~530B-635B	USD ~590B+	Stable large TAM
Skincare	USD ~278B	USD ~361B	Solid expansion
Peptide skincare niche	USD ~2B-3B	USD ~4B-6B+	Faster than core skincare
Sports nutrition	USD ~46B-72B	USD ~72B-79B	High demand, broad adoption
Bodybuilding supplements	USD ~27B	USD ~36B-47B	Strong category momentum
Medical aesthetics (signal market)	USD ~20B	USD ~33B	Premium appearance spend

3. Product Portfolio

Line A - Cosmetic Performance (Topicals):

- Peptide repair serum
- Barrier recovery cream
- Brightening day gel
- Eye and fine-line complex
- Scalp density support serum

Line B - Body Performance (Supplements):

- Creatine monohydrate
- Protein blend (whey/plant variants)
- Pre-workout focus blend
- Recovery and sleep formula
- Hydration electrolyte stack

Line C - Looksmax Systems (Bundles):

- 30-day Skin + Strength starter kit
- 60-day Lean + Sharp program
- 90-day complete looks optimization protocol

4. Regulatory Difficulty Map

Category	Regulatory Difficulty	Key Compliance Points	Plan Decision
Topical cosmetics	Medium	MoCRA-style facility/product obligations, adverse event handling, compliant labeling	Core category
Sports/body supplements	Medium-High	Structure/function claim rules, cGMP, substantiation discipline	Core category
Clinical aesthetics products	High	Higher evidence/claims burden and jurisdiction complexity	Phase-2 expansion
Injectable gray-market peptide models	Very High	Major legal exposure and enforcement risk	Excluded

5. Country Rollout Plan

Tier	Countries	Rationale
Tier 1	United States, India	Best mix of value capture + growth velocity
Tier 2	UAE, Saudi Arabia, UK, Germany	Premium demand and scalable distribution partnerships
Tier 3	China, Brazil	Large potential with higher execution complexity

6. Go-to-Market Strategy

- **Channel mix:** DTC first, marketplace second, selected gym/clinic/barber retail pilots.
- **Acquisition:** creator affiliate engine + paid social + educational content funnel.
- **Retention:** subscription + protocol onboarding + cross-sell by customer goal profile.
- **Positioning:** science-grade results without regulatory overclaiming.

7. Operating Model

Supply and Quality

- Contract manufacturing with audited partners.
- Dual-source critical ingredients for resilience.
- In-house quality documentation, lot tracing, and complaint workflow.

Core Team (Year 1)

- General Manager / Founder
- Product + Quality Lead
- Regulatory and Claims Lead
- Growth and Content Lead
- Operations and Customer Success

8. Financial Plan (Illustrative)

Metric	Year 1	Year 2	Year 3
Revenue	USD 1.2M-2.5M	USD 4M-8M	USD 10M-20M
Gross Margin	55%-65%	60%-70%	62%-72%
Repeat Purchase Rate	25%-40%	35%-50%	45%-60%
Contribution Margin	Negative to breakeven	Positive	Strong positive

9. Milestones (First 12 Months)

- M1-M2: finalize 8-12 launch SKUs and regulatory/claims workflow.
- M3: launch DTC and first creator cohort.
- M4-M6: launch protocol bundles and subscriptions.
- M7-M9: marketplace expansion and first offline pilots.
- M10-M12: tier-2 country readiness and scale planning.

10. Key Risks and Controls

Risk	Impact	Mitigation
Regulatory claim overreach	High	Mandatory pre-publication claims review
Paid media volatility	Medium-High	Diversify with affiliates, SEO, and retention growth
Ingredient cost volatility	Medium	Dual sourcing and contract purchasing
Competitive saturation	Medium	Protocol products + trust-led content differentiation

11. Funding Use (Seed Example: USD 500k-1.5M)

- 30% inventory and production
- 25% customer acquisition and creator partnerships
- 15% product development and testing
- 15% team and operations
- 10% compliance/legal/regulatory
- 5% contingency

Final Strategy Statement

Build a cross-category **Performance Aesthetics Lab** that captures both beauty and bodybuilding demand while maintaining strict compliance discipline. This model offers high growth potential with lower legal downside than gray-market peptide

approaches.
